Summary

MERN stack developer who has been shipping production-ready, AI-integrated applications since 2023. Built and deployed multi-LLM platforms on OpenAI and Anthropic APIs, real-time file-sharing systems on AWS, and internal tools with measurable impact — 40% faster DB queries, 50% faster deployments. Looking for full-stack or AI engineering roles where I can keep building and shipping fast.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Redux, Tailwind CSS, HTML5, CSS3, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets
AI & LLMs: OpenAI API, Anthropic API, Prompt Engineering, RAG (basics), Token & Rate Management
Databases: MongoDB, MySQL, PostgreSQL, Redis, GridFS, Query Optimization
DevOps & Tools: Git, GitHub, Docker, Jenkins, CI/CD Pipelines, AWS S3, Postman

Education

Graphic Era Hill University — Dehradun, India
B.Tech in Computer Science and Engineering — *Sept 2022 – June 2026*

Experience

Full Stack Developer Intern — Aug 2025 – Oct 2025
LaunchED Global — *Remote*

- Reduced DB query time by 40% via schema redesign and MongoDB indexing across production collections.
- Cut deployment time by 50% by building Jenkins + Docker CI/CD pipelines, replacing manual release workflows.
- Built 20+ REST API endpoints with JWT auth, rate limiting, and secure LLM API key management for AI content automation.

Technical Mentor — Full Stack — Aug 2023 – Aug 2024
WeCode Club — *Dehradun, India*

- Mentored 100+ students across MERN stack, system design, and AI API integration workshops.
- Led end-to-end code reviews and debugging sessions; helped students ship production-ready full-stack applications.

Projects

Imaginova | *React.js, Node.js, OpenAI API, Anthropic API, JWT* | GitHub | Live ↗

- AI content generation platform with multi-LLM support (OpenAI + Anthropic) for text, image, and structured output — deployed and live.
- Implemented RBAC, token-based rate limiting, encrypted API key handling, and JWT auth — production-grade security at fresher level.

PersonalSpace | *React.js, Node.js, MongoDB GridFS, AWS S3, WebSockets* | GitHub

- Cloud storage platform supporting 100MB uploads, drag-and-drop UI, and AWS S3-backed storage with a high-availability architecture.
- Built real-time P2P LAN file sharing via WebSockets with live transfer tracking and JWT-secured file encryption.

Propel | *React.js, Node.js, Express.js, Generative AI APIs* | GitHub | Live ↗

- GenAI model management platform giving users a unified interface to interact with multiple AI models and their generative capabilities.
- Built the API integration layer and workflow logic behind a responsive dashboard for configuring and monitoring model usage.

WorkAlly | *React.js, Node.js, Express.js, MongoDB* | GitHub | Live ↗

- Web-based employee management system centralizing employee records and administrative operations.
- Built the core data-management workflows and a responsive dashboard UI powering day-to-day HR operations.

Certifications

- **Claude Code 101** — Anthropic — Jun 2026
- **NodeJS Masterclass** (Express, MongoDB, OpenAI) — Udemy
- **Complete Jenkins DevOps CI/CD Pipeline Bootcamp** — Udemy
- **Ultimate Ethical Hacking & Penetration Testing (UEH)** — Udemy — Nov 2023
- **The Complete 2024 Web Development Bootcamp** — Udemy — Feb 2024
