SUMMARY

Full Stack Developer with hands-on experience building scalable MERN stack applications and AI-integrated platforms. Skilled in designing RESTful APIs, integrating LLM and third-party AI APIs, optimizing database performance, and implementing CI/CD pipelines. Experienced in prompt engineering, secure API key handling, and delivering production-ready AI features in React and Node.js applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, SQL
Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets
AI & APIs: LLM API Integration (OpenAI, Anthropic), Prompt Engineering, AI Workflow Automation, RAG (basics), Rate Limiting & Token Management
Databases: MongoDB, MySQL, PostgreSQL, Redis, Query Optimization, Indexing
DevOps & Tools: Git, GitHub, Docker, Jenkins, CI/CD, Postman, AWS S3, VS Code

EDUCATION

Graphic Era Hill University <i>B.Tech in Computer Science and Engineering</i>	Dehradun, India Sept 2022 – July 2026
---	--

EXPERIENCE

Full Stack Developer Intern <i>LaunchED Global</i> - Developed scalable full-stack applications using React.js, Node.js, Express.js, and MongoDB, including AI API-powered features for automated content workflows. - Built 20+ RESTful API endpoints with JWT authentication, error handling, and input validation; integrated third-party AI APIs with rate limiting and secure key management. - Optimized database schemas and implemented indexing strategies that improved query performance by 40%. - Implemented CI/CD pipelines using Jenkins and Docker, reducing deployment time by 50% through automation.	Aug 2025 – Oct 2025
Technical Mentor — Full Stack & Security <i>WeCode Club</i> - Conducted workshops on MERN stack development, system design, and AI API integration for 100+ students. - Mentored students in building end-to-end applications; conducted code reviews and debugged full-stack issues.	Aug 2023 – Aug 2024

PROJECTS

Imaginova | *React.js, Node.js, OpenAI API, JWT* | [GitHub](#)

- Built an AI-powered content generation platform integrating LLM APIs (OpenAI/Anthropic-compatible) with a clean React.js interface supporting text, image, and structured content generation.
- Engineered prompt templates and system instructions to improve AI output quality and consistency across use cases.
- Implemented secure API key handling, token-based rate limiting, and role-based access control (RBAC) to prevent misuse and protect data integrity.

Personal Space | *React.js, Node.js, MongoDB GridFS, AWS S3* | [GitHub](#)

- Developed a secure cloud storage platform supporting file uploads up to 100MB with drag-and-drop UI, file sharing, and automated AWS S3 backups ensuring 99.9% availability.
- Implemented JWT authentication, file encryption, and MongoDB GridFS for efficient large-file handling.
- Built a local-network peer-to-peer file sharing module using WebSockets for real-time transfer state management.

Anime TV Tracker | *React.js, Node.js, Express.js, MongoDB, External APIs* | [GitHub](#)

- Built an anime tracking app with search, browse, and personalized watchlists via external API integration; implemented a caching strategy reducing API calls by 70%.
- Designed a responsive UI with pagination and infinite scroll supporting 5,000+ anime titles.

CERTIFICATIONS

The Complete 2024 Web Development Bootcamp — Dr. Angela Yu, Udemy | 60+ hours, MERN stack, APIs, deployment
